November 11th, 1918

Professor F. L. Bishop,

University of Pittsburgh.

Dear Mr. Bishop:

I have to thank you for your letter asking us to nominate one or more delegates to represent the University of Toronto for the joint meeting of the British Educational Mission and the Society for the Promotion of Engineering Education. I am afraid, however, that owing to conditions that exist here partly arising from the shortening of the term through influenza it would be difficult for any of the staff to leave their work for this term.

Yours sincerely,

President.

May 21st, 1919

Mr. H. F. Bishop,

Secretary, Society for the Promotion of Engineering Education,

University of Pittsburgh.

My Dear Sir:

I am sorry that owing to a change in the Deanship in the Faculty of Applied Science I am unable to give you a favourable answer with regard to the attendance of a member of the Faculty of the University of Toronto to the meeting of the Society for the Promotion of Engineering Education at the end of June. I hope, however, that next year when the new Dean is in office he will arrange for more than to be present.

Yours sincerely,

President.
